RE: Coverage under VPDES Industrial Storm Water General Permit
VAR051534, Mathews Salvage Source

Dear Mr. Beattie:

We have reviewed your Registration Statement received on July 1, 2009, and subsequently revised November 3, 2009 and have determined that the facility identified in the Registration Statement is hereby covered under the referenced VPDES general permit. Your coverage under this permit became effective on November 3, 2009. The enclosed copy of the general permit contains the applicable Storm Water Pollution Prevention Plan (SWPPP), sector specific requirements, benchmark monitoring requirements, Total Maximum Daily Load (TMDL) requirements, and other conditions of coverage.

A Discharge Monitoring Report (DMR) for your outfall that requires benchmark monitoring is included with the permit. The DMR specifies the applicable monitoring parameters required by the permit. A DMR is to be completed for each permitted outfall for each monitoring period (see the permit for the specific monitoring periods for each applicable monitoring type), and you are responsible for obtaining additional copies of the DMRs. The DMRs must be submitted to this office on the schedule shown in the permit in Part I A 4, Table 70-4.

Since notification of permit coverage is occurring following the end of the July 1, 2009 to December 31, 2009 monitoring period, your facility's first monitoring period will start with the monitoring period beginning January 1, 2010. The first DMR will be due no later than January 10, 2011. Please see Table 70-4 of the permit for other monitoring reporting requirements and reporting due dates.

Your facility has been identified as discharging to a water body with a Total Maximum Daily Load (TMDL) established by the Board and approved by EPA. As such, your Storm Water Pollution Prevention Plan (SWPPP) is to employ an iterative program to select, install, implement and maintain appropriate Best Management Practices (BMPs) designed to minimize pollutants in your storm water discharges, and to address any exceedance of applicable water quality standards. A copy of the TMDL report may be viewed at:

<http://www.deq.virginia.gov/tmdl/apptmdls/shellfish/eastrvr.pdf>

The Industrial Storm Water General Permit Regulation (9 VAC 25-151-60.C.8.) requires you to update your SWPPP and to submit an updated Site Map by October 1, 2009. The DEQ instructions accompanying the Registration Statement form that you submitted made reference to this requirement. Please refer to Part III B 2 c of your enclosed permit for SWPPP Site Map details. As the October 1, 2009

VAR051534, Mathews Salvage Source
Permit Transmittal Letter
February 1, 2010
Page 2 of 2

deadline has passed, please submit your updated map to this office as soon as possible, but no later than 3 months from the date of this letter.

This general permit will expire on June 30, 2014. The permit requires that you submit a new registration statement at least 90 days prior to that date if you wish continued coverage under the general permit, unless permission for a later date has been granted by the Board. Permission can not be granted to submit the registration statement after the expiration date of the permit.

If you have any questions, please do not hesitate to contact Tamira Cohen at (804) 527-5012 or via email at tamira.cohen@deq.virginia.gov.

Sincerely,

Curtis J. Linderman, P.E.
Water Permit Manager
